The Jacqueline M. Wilentz Breast Center at Howell offers western Monmouth County residents convenient access to Monmouth Medical Center's renowned breast health services, in conjunction with Kimball Medical Center in Lakewood.

Our satellite facility offers screening mammography services in a comfortable and compassionate setting. All imaging exams conducted at our satellite location are performed by experienced mammography technologists and interpreted by Monmouth Medical Center's dedicated breast imagers. No appointments are required for mammography services.

What We Offer

Our state-of-the-art facility offers the latest in medical equipment, technology and services, including:

Screening Mammography

For patients with no abnormal breast symptoms, a screening mammogram offers the best opportunity for early detection of breast cancer. The procedure takes approximately 15 minutes and most screening mammograms do not require a physician order. Once a baseline is established, future mammograms are compared to detect changes through the aging process.

Breast Cancer High Risk Program

At registration, mammography patients use a tablet-style computer to check off answers to questions related to breast history and family cancer history. Based on guidelines published by the National Comprehensive Cancer Network, the data gathered helps us estimate each patient's risk of gene mutation as well as lifetime risk of developing breast cancer. Risk assessment reports are then provided to both the patient and their physician.

A Commitment to Excellence

A host of quality recognitions illustrate the Wilentz Center's commitment to outstanding care.

- The Jacqueline M. Wilentz Comprehensive Breast Center is the first facility in New Jersey and the 10th in the nation to be accredited as a **Certified Quality Breast Center** by the National Quality Measures for Breast Centers.
- Joining only a handful of breast imaging centers across the nation, the Wilentz Center was designated a **Breast Imaging Center of Excellence** by the American College of Radiology's (ACR) Commission on Quality and Safety and the Commission on Breast Imaging.
- The Wilentz Center is the first center in Monmouth and Ocean counties to be granted three-year full accreditation designation by The National Accreditation Program for Breast Centers (NAPBC) for "**providing the highest quality evaluation and management of patients with breast disease.**"
- The Wilentz Center is the first facility in New Jersey and just the 20th in the nation to earn **American College of Radiology Gold Seal Accreditation** for breast MRI.

To Learn More

For more information, call the Jacqueline M. Wilentz Comprehensive Breast Center main number at 732.923.7700, or visit www.monmouthwilentzbreastcenter.com.

Kimball Medical Center is partnering with Monmouth Medical Center's Jacqueline M. Wilentz Comprehensive Breast Center to bring the Maximizing Mammography Participation Program to Monmouth and Ocean counties. Through this program, a grant from the Susan G. Komen Foundation, we provide free mammograms to women over the age of 65 and those who are uninsured or underinsured and over the age of 40. If you have any questions or wish to determine if you or someone you know is eligible for this free screening, please call the Kimball Medical Center Outreach Coordinator, Irene Spinelli, at 732.886.4731.
